

Dr Delyone de Paula Canedo Filho - Harvard Master degree Application - Curriculum Vitae

Physician with integrated experience in critical care and healthcare systems, focused on bridging clinical decision-making with system-level efficiency, quality, and patient safety.

Delyone De Paula Canedo Filho, MD

Goiânia, Brazil | +55 63 99217-9738 | delyone.filho@gmail.com | ORCID: 0000-0003-2372-7352 | CRM-GO 32985 | GMC Ref: 8173513

EDUCATION

Universidade Federal do Tocantins (UFT) – Brazil

Doctor of Medicine (MD) | 2022

Harvard University (HarvardX)

Certificate – *Improving Global Health: Focusing on Quality and Safety* | 2026

Massachusetts Institute of Technology (MIT)

Course – *Science of Learning and Memory* | 2025

PROFESSIONAL EXPERIENCE

State Medical Regulator – Emergency and Hospital Bed Management

State Health Department of Tocantins (SES-TO) | 2025

- Coordinated patient flow and critical care resource allocation across a regional network, directly impacting access to ICU-level care and system efficiency under resource constraints
- Performed clinical prioritization integrating patient acuity and system capacity constraints
- Acted as interface between hospitals, emergency transport, and public health infrastructure
- Contributed to system-level decision-making under time-critical and resource-limited conditions

Physician – Intensive Care Unit (ICU)

Hospital Geral Público de Palmas (HGPP) | 2022–2025

- Managed critically ill patients in high-acuity ICU setting, integrating advanced clinical decision-making with resource constraints to optimize survival and care delivery
- Delivered advanced life support including mechanical ventilation and vasoactive management
- Applied evidence-based protocols in high-acuity environments with limited resources
- Integrated clinical decision-making with system constraints to optimize patient outcomes

Physician – Pediatric Emergency & Neonatal Care

Hospital Materno Infantil (HMITD) | 2024–2025

- Provided emergency and neonatal care in high-complexity maternal-child settings
- Performed neonatal resuscitation and managed acute pediatric critical conditions
- Recognized early deterioration and escalated care within multidisciplinary systems

Physician – Oncology Emergency Care

Hospital do Câncer Araújo Jorge | 2024

- Managed oncologic emergencies in immunocompromised patients
- Led treatment of sepsis, febrile neutropenia, and metabolic crises
- Collaborated with oncology teams in tertiary care environment

Physician – Emergency Department

Hospital Regional de Dianópolis | 2022–2023

- Delivered frontline emergency care across a broad spectrum of acute conditions
- Performed stabilization, diagnostic reasoning, and admission coordination

Medical Volunteer – COVID-19 Response (Telehealth)

Federal University of Tocantins | 2020–2021

- Provided remote triage and clinical guidance during pandemic response
- Supported implementation of population-level clinical protocols

RESEARCH AND ACADEMIC WORK

- Principal investigator of a PROSPERO-registered research initiative exploring AI-assisted cognitive mapping in high-performance human cognition
- Published author in peer-reviewed journals (psychiatry, obstetrics, clinical medicine)
- Contributor to systematic reviews and meta-analyses
- Book author and chapter contributor in interdisciplinary health sciences

INNOVATION

- Inventor of a computational method for asymmetric contextual information management in human–AI interaction systems (Patent filed, Brazil, 2026)

TEACHING AND LEADERSHIP

- Medical preceptor – supervised clinical training of medical students
- Participated in development of clinical reasoning and evidence-based decision-making

SKILLS

- Clinical: Critical care, emergency medicine, advanced life support
- Systems: Healthcare flow management, resource allocation, clinical prioritization
- Research: Evidence synthesis, systematic review, scientific writing
- Languages: Portuguese (native), English (fluent)
