Employment

Employment history

Employment history

Employer name
Hospital Geral Público de Palmas (HGPP)

Employer address
Palmas, Tocantins, Brazil

Type of business
Tertiary public hospital – Critical care / Intensive Care Unit

Reporting to (job title)
ICU Medical Coordinator / Senior ICU Physician

Telephone

Your job title
Physician – Intensive Care Unit (ICU)

Start date
September 2022

End date
December 2025

Grade
Meddicam officer // ICU physician

Salary
R\$1400/12h

Period of notice
Immediate / as required.

Reason for leaving (if applicable)
End of contract; pursued broader clinical experience in emergency and system-level care.

Brief description of your duties & responsibilities
Managed critically ill medical and surgical patients in high-acuity ICU. Delivered advanced life support including invasive/non-invasive ventilation, hemodynamic monitoring and vasoactive support. Led decision-making in shock, sepsis and multi-organ failure. Applied evidence-based protocols under high-pressure conditions, collaborating within multidisciplinary teams to optimise patient outcomes.

Employer name
Hospital Materno Infantil Raimunda Aires (HMITD)

Employer address
Porto Nacional, Tocantins, Brazil

Type of business
Public maternal and child hospital – Emergency & Neonatal care

Reporting to (job title)
Emergency Department Coordinator / Senior Pediatric Physician

Telephone
+5563992179738

Your job title
Physician – Pediatric Emergency & Neonatal Care

Start date
October 2024

End date
August 2025

Grade
Medical Officer / Emergency Physician

Salary
R\$ 15.000~20.000 / mes

Period of notice
Immediate/ as required

Reason for leaving (if applicable)

Your job title
Physician – Acute Oncology & Emergency Care

Start date
February 2024

End date
September 2024

Grade
Medical Officer / Emergency Physician

Salary
R\$1400/ 12h

Period of notice
Immediate / As required

Reason for leaving (if applicable)
End of contract; continued progression in critical care and emergency medicine.

Brief description of your duties & responsibilities
Managed acute oncological emergencies in immunocompromised and high-risk patients. Led initial management of sepsis, febrile neutropenia and metabolic complications. Identified early clinical deterioration and delivered time-critical interventions in high-complexity emergency setting. Worked closely with oncology teams to optimise patient outcomes.

Employer name
Hospital Regional de Dianópolis (HRD)

Employer address
Dianópolis, Tocantins, Brazil

Type of business
Regional public hospital – Emergency care

Reporting to (job title)
Emergency Department Coordinator

Telephone

Your job title
Physician – Emergency Department

Start date
July 2022

End date
August 2023

Grade
Medical Officer / Emergency Physician

Salary
R\$ 30.000

Period of notice
Immediate/ as required

Reason for leaving (if applicable)
Career progression to intensive care and specialised roles.

Brief description of your duties & responsibilities
Managed moderate to high-acuity emergency cases in regional hospital setting. Performed rapid assessment, stabilisation and initial management across a broad range of acute conditions. Delivered advanced life support and clinical decision-making under resource-limited and high-demand environments. Ensured continuity of care through admissions, referrals and coordination with regional services.

Employer name
Hospital Municipal da Mulher Célia Câmara (HMMCC)

Period of notice
Immediate / As required

Reason for leaving (if applicable)
End of contract.

Brief description of your duties & responsibilities
Managed critically ill patients in obstetric and general ICU setting, including hemodynamic instability, sepsis and acute complications. Delivered advanced life support with ventilatory and hemodynamic management. Performed rapid decision-making in high-risk, time-critical scenarios, collaborating within multidisciplinary teams to optimise outcomes.

Gaps in employment

Gaps in employment

If you have any gaps within your employment history, please state the reasons for the gaps below.
No significant gaps. Continuous clinical practice across emergency, intensive care and system-level roles, with ongoing professional development.

Supporting Info

Personal statement

Personal statement

Provide a personal statement which you can use as a starting point to your supporting information for specific applications.

Note: This personal statement will need to be tailored at the point of submitting an application.

I am a physician with consolidated experience across emergency medicine, intensive care and system-level coordination, working in high-acuity and resource-constrained environments. My clinical practice has involved the management of critically ill patients, including advanced life support, ventilatory support and haemodynamic stabilisation, with consistent responsibility for rapid and high-stakes decision-making.

I have developed the ability to assess, prioritise and act under pressure, managing acute and life-threatening conditions while maintaining patient safety and clinical accuracy. My experience spans adult, paediatric and neonatal care, allowing me to adapt to different clinical contexts while maintaining a structured and evidence-based approach.

In addition to frontline clinical work, I have worked in emergency regulation and hospital bed management at a state level, where I was responsible for clinical triage, prioritisation of admissions and coordination of patient flow across a regional healthcare network. This role strengthened my understanding of healthcare systems, resource allocation and operational decision-making in time-critical scenarios.

These combined experiences allow me to integrate clinical reasoning with system awareness, ensuring that decisions are both medically appropriate and operationally feasible. I am able to function effectively within multidisciplinary teams, communicate clearly in high-pressure environments and maintain a consistent focus on patient safety and quality of care.

I bring a structured, reliable and adaptable approach to clinical practice, with the capacity to operate across different levels of the healthcare system while contributing to safe, efficient and patient-centred care.

Full time

Medical and/or dental practical experience

Medical and/or dental practical experience

Please list your practical experience. This should refer to verifiable Log Book/Portfolio Evidence which will need to be presented by all appointed candidates. Please list the most recent first.

Practical experience	Number completed under senior supervision	Number completed independently
Intubation	3	35
Central venous access	2	200+
Mechanical ventilation	3	80
Emergency resuscitation	1	15
Chest drain	1	6
Paediatric & neonatal resuscitaTion	3	80
Minor surgical procedures (wound repair / soft tissue reconstruction)	3	100
Regional / local anaesthesia (including nerve blocks)	4	70
Procedural sedation (including paediatric cases)	4	40

Please briefly describe the extent of your proficiency and experience in the procedures highlighted above, along with any particular clinical skills/experience/special interests you possess that you may wish to highlight.

. I am committed to continuous professional development and recognise the importance of refining both clinical and system-level skills. While I am confident in managing acute and high-acuity cases, I aim to further develop my understanding of UK clinical pathways, guidelines and healthcare structures. I am also keen to strengthen my experience in clinical governance, audit and quality improvement. Additionally, I seek to improve my communication within multidisciplinary teams in a new healthcare environment. I actively engage in learning opportunities and welcome feedback, supervision and structured support to ensure safe, effective and high-quality patient care.

 Maximum of 100 words

In reflecting on your own skills and abilities, are there any areas where you might seek further development and support?

I see professional development as an essential part of safe and effective medical practice. While I am confident managing acute and high-acuity cases, I am committed to developing my understanding of UK clinical pathways, governance structures and multidisciplinary workflows. I am particularly interested in strengthening my involvement in quality improvement and audit, ensuring that clinical decisions translate into system improvements. I also value refining communication within diverse teams. I approach development with openness and accountability, actively seeking feedback and support to ensure my practice remains safe, adaptable and aligned with high standards of patient care.

Socio-economic background

Socio-economic background

Your socio-economic background

The information collected will remain confidential and will be used for statistical purposes only. Employers will not use this data to identify you during the recruitment process.

Many employers using Trac aim to create a more inclusive National Health Service (NHS) where everyone has an opportunity to succeed regardless of background. To achieve this, they need to understand the diversity of their workforce. This information is optional on your profile. However, if you choose not to provide it here, some employers may still request it during the application process.

What was the occupation of the main earner in your household when you were 14 years old?

Small Business Owners who employed less than 25 people

What type of school did you attend for most of the time between ages 11 and 16?

Attended school outside the UK

Were you eligible for free school meals at any time?

Yes
